PROJECTS

SAIZER

Sept 2023

Technology: HTML, Tailwind CSS, ReactJs, Redux, Rapid API.

[GitHub](#)

- Developed and implemented "Saizer," an open-source article summarizer that efficiently condenses lengthy articles into concise and clear summaries. This project aimed to save time for users by extracting essential information from web pages, enabling them to collect valuable insights effortlessly.

GYM APPLICATION FOR VIT BHOPAL

Jan 2024

Technology: HTML/CSS, ReactJs, MySQL, Realtime API

[GitHub](#)

- As the creator of the VIT Bhopal Gym Hub website, I developed a user-friendly platform tailored for students' fitness journeys. Offering in-depth knowledge on various exercises, users can effortlessly search and discover routines based on their preferences. The site fetches real-time data from an API, ensuring the latest fitness trends and techniques. Curating instructional videos from YouTube, the platform enhances user understanding and technique. I designed a personalized gym experience, empowering users to craft routines aligning with their fitness goals. Joining this venture showcases my ability to create innovative solutions that cater specifically to the needs of the VIT Bhopal community.

ZENCHAT

Jan 2024

Technology: HTML/CSS, ReactJs, Firebase (Cloud)

[GitHub](#)

- A Introducing ZenChats, a dynamic chatting application revolutionizing your communication experience. Seamlessly connecting friends, this app utilizes Firebase as its robust cloud service, ensuring real-time chats and secure user authentication through Google Auth. Continuously evolving, I am dedicated to enhancing ZenChats daily, introducing new functions to elevate user experience. With a commitment to user-friendliness and interactivity, ZenChats is not just a chat app – it's a platform that evolves with your needs. Join the conversation, witness the transformation, and stay tuned for the latest features that make connecting with friends a truly zen experience.
